ABOUT ME

Android Developer with 3 years of experience building and evolving mobile applications across big tech and startup environments. Strong background in Kotlin, Jetpack Compose, Clean Architecture, MVVM and modularized applications, from new feature development to maintenance and refactoring. Detail-oriented and quality-driven, with experience in code reviews, testing, collaborative development and Spec-Driven Development.

WORK EXPERIENCE

January 2025 – March 2026

Android Developer Jr.

ACT Digital (Client: Globo)

GloboPop

- Developed and maintained a Compose-first, modular Android application focused on short-form vertical video experiences using Kotlin.
- Developed end-to-end profile features, including profile editing and the display of liked content, integrating GraphQL APIs.
- Built app personalization features using Jetpack Compose, contributing to a modern and consistent user experience.

Premiere & Combate

- Developed and maintained Android applications using Kotlin, contributing to new features, bug fixes and ongoing improvements.
- Worked on TV-focused features and experiences, supporting content consumption across different Android platforms.
- Implemented and maintained application metrics and analytics, tracking user interactions and content consumption to support product and business insights.
- Collaborated on code reviews, testing and debugging within a team-oriented development environment.

May 2023 – November 2024

Android & Backend Developer Jr.

Horus

- Maintained and evolved mobile applications, implementing new features, fixing bugs and improving application stability and overall user experience.
- Developed backend services and REST APIs using Java and Spring Boot, supporting mobile application features and business logic.
- Developed Python-based web scraping solutions to collect, process and integrate data from external sources.
- Worked across mobile and backend systems, integrating APIs and data flows between client and server-side components.

ADDITIONAL WORK EXPERIENCE

August 2016 – Present

Broadcast Operations (freelance)
Olympic Broadcasting Services

- Worked in an international, English-first technology and broadcasting environment, supporting major live sports events and global broadcast operations.
- Progressed from Logger to Quality Control Coordinator, taking on increasing responsibilities across technical operations and quality assurance.
- Coordinated a quality control team, overseeing day-to-day activities and collaborating with international teams to maintain broadcast standards during live events.

Olympic Games: Dakar 2026 (Youth) · Milano Cortina 2026 · Paris 2024 · Beijing 2022 · Tokyo 2020 · Buenos Aires 2018 (Youth) · PyeongChang 2018 · Rio 2016

EDUCATION

Universidade Federal do Rio de Janeiro (UFRJ)

- Bachelor's Degree in Biological Sciences — 2022

LANGUAGES

- **Portuguese:** Native
- **English:** Fluent
- **Spanish:** Basic

SKILLS

- Kotlin
- Jetpack Compose
- Android SDK
- Coroutines / Flow
- MVVM
- Clean Architecture
- Modular Architecture
- Java
- Spring Boot
- Python
- REST APIs
- GraphQL
- Spec-Driven Development (SDD)
- OpenSpec
- Git
- Firebase
- Room
- Retrofit
- Hilt
- Android TV
- Agile / Scrum
